Profile

Motivated and detail-oriented Frontend Developer with hands-on experience in building responsive, user-centered interfaces using modern frameworks like React and Next.js. I am known for fast learning, adaptability, and writing clean, maintainable code. Proven ability to collaborate effectively within teams and deliver high-quality solutions from concept to deployment. Continuously seeks growth through real-world challenges and technical advancement.

Education

Bachelor of Computer Science,   10/2021 – 07/2025
Faculty of computers and Information , Assiut University   Assiut, Egypt
Gpa : 3.23

Professional Experience

MERN stack developer, *CodeVerse*   05/2025 – Present
• Co-founded Codeverse, a freelance software development team focused on   Remote
building modern web applications.
• Led the design and development of full-stack projects using the MERN stack
(MongoDB, Express.js, React.js, Node.js), Collaborated with a cross-functional team
of designers and developers to deliver client solutions tailored to business needs.
Integrated RESTful APIs, user authentication, and responsive UI using React and
Tailwind CSS.
• Actively involved in project planning, task distribution, and technical mentoring
within the team.

Projects

City Guid, *Frontend developer* ⧉   09/2024 – 07/2025
A web platform that enables users to explore essential services across Egypt—such
as restaurants, hospitals, schools, and clinics— with role-based dashboards for
users, doctors, restaurant admins, and a super admin.

- Designed and built responsive UI components for hospitals, schools, and
  restaurant views using React.js and Tailwind CSS.
- Developed dashboards for restaurant admins and super admins to manage
  content, orders, and roles. Implemented booking systems for doctors and food
  ordering features.
- Utilized Next.js for routing and TypeScript for maintaining robust, scalable code.
  Ensured full mobile responsiveness and accessibility.

Codeverse Portfolio, *Frontend developer* ⬈   05/2025 – 06/2025

A modern and responsive portfolio website for the Codeverse software team,
highlighting services, values, and projects, and acting as a contact gateway for
potential clients.

- Built the entire frontend using React and Tailwind CSS with mobile-first
  responsiveness.
- Integrated Next.js features like dynamic routing and SSR for SEO and
  performance optimization.

MZ-Commerce, *Frontend developer* ⬈   09/2023 – 01/2024

An interactive online shopping platform offering seamless product browsing,
filtering, and ordering experience.

- Developed fully responsive UI using Tailwind CSS with a utility-first approach.
  Built core pages including Homepage, Product Details, Shopping Cart, and
  Checkout.
- . Implemented global state management using Redux (cart, user, products).
  Enabled real-time cart updates with total price calculation. Integrated product
  filtering and sorting by category and price.
- Used React Router for fast and smooth client-side navigation. Ensured modular
  code structure using reusable React components.

Skills

Frontend Development
HTML, CSS, JavaScript, TypeScript, Tailwind CSS.

Backend Development
REST API, Node.js, Express.js

Database Management
MySQL, MongoDB

Framework
React, Redux Toolkit, Nextjs
